

ZOOLOGICAL MUZEUM JAGIELLONIAN UNIwersITY

Ingardena 6, 30-060 Kraków, Poland, phone (+48 12) 6334775, www.mzuj.uj.edu.pl, e-mail: wojt@zuk.iz.uj.edu.pl

For many years we were trying to find the manufacturer who could provide us with a high standard professional drawers for safe preservation of entomological collections.

Fifteen years ago our Museum developed the cooperation with professional carpentry company - "Pracownia Stolarska Majkowski". The company, guided by our staff, was constantly improving their products and developed entomological drawers that are of the highest quality standards in terms of pest-proof construction and a nice looking, general design.

After many years of my research as an entomologist and after taking several visits to natural history museums in Europe and in North America I feel competent to express my opinion that the quality of entomological drawers and storage cabinets manufactured by "Pracownia Stolarska Majkowski" in Kraków, Poland is exceptional.

We are proud to have this company as a main supplier of drawers and other furniture necessary for developing and maintaining entomological collections in our Museum.

I strongly recommend "Pracownia Stolarska Majkowski" to any natural history museum, or research institution looking for a reliable supplier of highest quality entomological furniture.

Prof. dr hab. Janusz Wojtusiak
Director of the Zoological Museum,
Jagiellonian University, Krakow
