To Whom It May Concern,

I would like to express my immense satisfaction with the quality and speed of the services provided by the Majkowski Woodworking Company (Pracownia Stolarska Majkowski).

Our large order of custom made entomological cabinets, drawers, drawer trays and herbarium cabinets was fulfilled in only a few weeks. The order was then delivered to the Biodiversity Laboratory in Gorongosa National Park, Mozambique – not an easy task, but the Majkowski Company organized the transfer and oversaw the entire process. All this at prices significantly lower than the competition in Europe and the US.

I highly recommend the Majkowski Woodworking Company to anybody interested in high quality museum or collection equipment, delivered quickly, and at very competitive prices.

With best regards,

Piotr Naskrecki, Ph.D.
